

ALZO Video Pan-L-Lite Case Loading Specification

Maximum loading of 2 QUAD and 2 TWIN lights

The following diagram is the recommended ALZO Pan-L-Lite case loading procedure. The stand mounts for all of the Pan-L-Lites are attached to the sides of the lights. Insert QUAD light first. Place 2 foam pads as shown on top of QUAD. Then invert TWIN light and place with handle down as shown.

Using the center divider foam panel to separate pairs of lights, allows for packing up to 4 lights in the case.
